

Pre-Election Advisory Service

It's election time again. It seems like you just finished electing officers. You can't conduct the election yourself, and your election committee is inexperienced.

Have you ever needed an election expert willing to coach your election team through the complexities, responsibilities, and planning for your next election?

BallotPoint Advisory Services will coach your election committee and administrative staff, working with them to formulate a comprehensive plan for your upcoming election.

We will cover the following topics in detail:

- Election committee duties and responsibilities
- Constitution and bylaws requirements
- Procedures for updating your mailing list

- Nomination procedures
- Ballot preparation
- Election notice requirements
- Campaign rules
- Conducting the election
- Post-election tasks

In addition, we offer a briefing session to inform candidates of the "do's and don'ts", including their rights and responsibilities in an election conducted under your union's constitution and the federal law.

Election challenges can be disruptive and costly. Don't take a chance by being unprepared.

Let BallotPoint help you prepare!
